(Institut poluprovodnikov Akademii nauk SSSR); Institute of Cyber-
netics, Academy of Sciences GruzSSR (Institut kibernetiki Akademii
nauk GruzSSR)TITLE: Conductivity nonlinearity effects due to charge carrier
injections in organic semiconductors ^{21, 14, 55} _{5, 44, 55}

SOURCE: Elektrokhimiya, v. 2, no. 1, 1966, 107-109

TOPIC TAGS: organic semiconductor, anthracene, volt ampere charac-
teristic, cuprous iodide, aluminum, contact effectABSTRACT: Research aimed at studying conduction processes associated
with charge-carrier injection into organic semiconductors has been
started. It is noted that lately a great deal of attention has been
paid to the problem of obtaining nonlinear and nonsymmetrical volt-
ampere characteristics for organic semiconductors. To this end an
organic semiconductor-electrode contact was constructed by applying
2 CuI electrodes, or a CuI and an aluminum electrode by vacuum

Card 1/2

ACC NR: AP6003501

sputtering across single crystals of anthracene. It was found that a nonlinear volt-ampere characteristic is obtained, $i \sim v^n$, where $n = 8-10$, regardless of the nature of the second electrode; the characteristic is symmetrical if the electrodes are both of CuI, and nonsymmetrical if one is CuI and the other Al. At the highest voltage used (~ 500 v), the rectification factor attained 3-5 orders [sic]. It was shown that conductivity is determined by the injection of holes from the CuI electrode into the anthracene crystal, and that injection is increased by illumination of the CuI electrode with monochromatic light of the appropriate wavelength. TITLE	: Summer Sowings of Maternal Sugar Beets
ORIG. PUR.	: Skharnaya prom-st', 1958, No.2, 58-60
ABSTRACT	: In the conditions of Kirgiz SSR the best date for sowing maternal sugar beets is the end of May to the first decade of June (the so-called summer sowing). Sowing in this period yields higher quality planting material. The crop of beets grown from seeds derived from maternal beet of the summer sowing is 7 to 9 % higher than the crop of beets grown from seeds of maternal roots of the spring sowing. With summer sowing the spacing is more dense (at 8 to 10 and even at 5 to 6 cm) with the uniformity of plantings being observed without fail.

TITLE: The calculation of filling time of ²⁵pneumatic systems with small working volumes

SOURCE: Leningrad. Politekhnicheskij institut. Trudy, no. 250, 1965. Avtomatizatsiya i tekhnologiya mashinostroyeniya (Automation and technology of machinery manufacture), 34-40

TOPIC TAGS: pneumatic device, approximation calculation

ABSTRACT: The customary evaluation of the filling time of a pneumatic system consisting of a distributor valve, working cylinder, and connecting air piping is carried out usually by simply adding the volume of the piping to the subpiston volume and thus establishing an overall "dead volume." However, this assumption which simplifies the calculation to a considerable degree but disregards local resistances is justifiable only when the volume of the piping is small compared to the subpiston region. Experiments using a methodology described earlier (B. N. Bezhanov, A. P. Kukushkina, Trudy LPI No 233, Avtomatizatsiya i tekhnologiya mashinostroyeniya, 1964, pp 59-68) showed that while the filling time with an added resistance near the end of the air pipe was close to the time without such a resistance, the filling time with the same added resistance at the input to the pipe increased

Card 1/2

ACC NR: AT5028813

by a factor of 1.5. Consequently, the present authors developed a new method of filling time calculation by splitting the volume into a sequence of "concentrated" volumes incorporating a varying degree of resistance. A comparison of the theoretical results calculated following the customary and the new method with the results of experiments showed that the errors were of the order of 80% and 20% for the two theoretical methods, respectively. Orig. art. has: 19 formulas and 3 figures.

TITLE: Methods and Results of Tests for Friction and Wear of Materials Employed in the Frictional Unit of a Deadwood Assembly (Metodika i rezul'taty ispytaniy na treniye i iznos materialov dlya uzla treniya deydvudnogo ustroystva)

PERIODICAL: Tr. Tsentr. n.-i. in-ta morsk. flota, 1956, Nr 5, pp 43-55

ABSTRACT: A description of procedures employed in an investigation of wear of deadwood bearing materials by means of samples (S) made of wood-layer plastics (WLP) or guaiac, under sliding friction, in conjunction with materials used in coating of propeller shafts, which were in the shape of rollers (R) made of bronzes BrOTs 10-2, BroTsS 5-5-5, and stainless austenite steel 1Kh18N9T. The S, which was composed of three parts, was secured in an adapter-yoke, in a manner ensuring maximum perpendicularity of surface fibers of each member of the S, with respect to the axis of rotation of the contacting R. In order to ensure equal pressure upon the S, pressure bolts were tightened with a calibrated torque wrench. The friction surfaces (the sides)

Card 1/2

137-1957-12-25433

Methods and Results of Tests for Friction and Wear of Materials (cont.)

of the S were machined to a class 8 finish on a lathe; the contact surface of the R had a class 9 finish. When ready to be tested the S and the R were broken in together, under a minimum load of 10 kg/cm^2 , which was then raised to 50 kg/cm^2 . The extent of wear of the S was determined by the difference of its linear dimensions, measured with an accuracy of $1/\mu$ on an IZV-1 distance gage, before and after each test. The wear of the R was determined by the difference in its weight, measured before and after the test with an accuracy of $\pm 0.0002 \text{ g}$. The surface finish of the S was inspected by means of a binocular microscope MIS-11, with the aid of special casts. Results of comparative wear- and friction tests are shown for materials investigated on the "MI" machine, in which lubrication was accomplished by salt water, and the speed of sliding was 0.5 m/sec . It is shown that R's made of stainless steel are the most durable, but that in that case the guaiac and the WLP are subjected to greater wear than when tested in conjunction with bronze R's, particularly under high specific pressures. Recommendations are given for the selection of coating metal for propeller shafts, and of material for the deadwood assembly.

TITLE: Synthesis of copolymeric polyureas

39
B

SOURCE: Vysokomolekulyarnyye soyedineniya, v. 7, no. 10, 1965, 1826-1829

TOPIC TAGS: polyurea, copolymeric polyurea, heat resistant plastic, wear resistant plastic

ABSTRACT: Copolymeric polyureas have been prepared by reacting a primary and a tertiary aromatic amine with an aliphatic diisocyanate. It is noted that homopolymeric polyureas are highly heat resistant, hard, and wear resistant but poorly processible because of low solubility and proximity of melting point and decomposition temperature. This work was done to eliminate these drawbacks. The monomers used were 4,4'-diamino-diphenylmethane (I), N,N'diethyl-4,4'-diaminodiphenylmethane (II) and 1,6-hexamethylene diisocyanate. It was found that the properties of the polymers depended on the I/(I + II) mole percent (x). With increasing x, the softening point rose from 70 to 270C, the decomposition temperature dropped from 320 to 260C, and solubility decreased simultaneously. However, these properties did not change in direct proportion to the change in x. The greatest change in properties occurred at high or low x's (and proved

to be associated with a morphology change). For example, at a small x (20%) the softening point is 220C (i.e., 40-50C below the softening point at $x = 100\%$) while the decomposition temperature remained high (300C). It is concluded that copolymeric polyureas can be prepared which are suitable for processing into end products. Orig. art. has: 1 table and 2 figures.

TITLE: A method for obtaining a modified carbamide resin, Class 39, No. 184438
[announced by Scientific Research Institute of Plastics (Nauchno-issledovatel'skiy
institut plasticheskikh mass)]

SOURCE: Izobret prom obraz tov zn, no. 15, 1966, 87

TOPIC TAGS: urea, resin, carbamide, formaldehyde, furfural

ABSTRACT: This Author Certificate presents a method for obtaining a modified carbamide resin based on urea, formaldehyde, and furfural. To increase the resistance of the resin to water, diatomic phenolresorcinol is added to the resin in the amount of 5--10% by weight of urea.

TITLE: A method of producing titanium-aluminum alloys. Class 40, No. 174792

44,11 27 44,55,2

SOURCE: Byulleten' izobreteniy i tovarnykh znakov, no. 18, 1965, 7.

TOPIC TAGS: alloy, titanium alloy, aluminum containing alloy

ABSTRACT: This Author Certificate introduces a method of obtaining titanium-aluminum alloys with 15—27% aluminum by reduction of titanium tetrachloride with magnesium. To simplify the process and reduce its cost, the titanium tetrachloride is first reduced with metallic aluminum in the presence of solid sodium chloride and then reduced with metallic magnesium or sodium.

Wired Radio Centers

"A Useful Book," O. Yelin

"Radio" No 6, pp 62, 63

Favorable review of G. A. Kazakov's new book "Our Country - The Birthplace of Radio." Book states that there were more than 11,000 wired radio centers in operation before the war. More than 1,000 were built in 1950 and more than 2,000 in 1951. Book also gives facts on development of radio broadcasting and radiofication in the People's Democracies and in the Chinese People's Republic.

[Calculations for measuring instruments] Raschet izmeritel'nykh priborov. Moskva, Gos. energeticheskoe izd-vo, 1955. 30 p. (Massovaia radiobiblioteka, no.215) [Microfilm]
(Measuring instruments)

GOL'DREYER, Iona Gutelevich; ROGINSKIY, Vladimir Yur'yevich; BERO, A.I.,
redaktor; DZHIGIT, I.S., redaktor; YELIN, O.G., redaktor; KULIKOV-
SKIY, A.A., redaktor; MOZHZHNEVLOV, B.Y., redaktor; SMIRNOV, A.D.,
redaktor; TARASOV, P.I., redaktor; TRAMM, B.Y., redaktor; CHECHIK,
P.O., redaktor; SHAMSHUR, V.I., redaktor; LEVITIN, Ye.A., redaktor;
VORONIN, K.P., tekhnicheskiy redaktor

[Self-righting amplifier systems] Samovypriamliaiushchie usilitel'-
nye skhemy. Moskva, Gos.energ.izd-vo, 1955. 46 p. (MLRA 9:3)
(Amplifiers, Electron-tube)

YELIN, E. G.
ROGINSKIY, Vladimir Yur'yevich; FEYOKL'S, Viktor Zinov'yevich; BERG, A. I.,
redaktor; DZHIGIT, I. S., redaktor; YELIN, O. G., redaktor; KULIKOVSKIY,
A. A., redaktor; MOZHZHEVYKOV, B. M., FEDAKTOF; SMIRNOV, A. D., redaktor;
TARASOV, F. I., redaktor; TRAMM, B. F., redaktor; CHERECHIK, P. O., redaktor;
SHAMSHUR, V. I., redaktor; KUBARKIN, L. V., redaktor; LARIONOV, G. Ye.,
tekhnicheskiy redaktor

[From microphone to loudspeaker] Ot mikrofona do gromkogovoritelia.
Moskva, Gos. energ. izd-vo, 1955. 63 p. (Massovaia radiobiblioteka,
no. 233) (MLRA 9:2)

(Radio)

YELIN, O.G.

LEVITIN, Yefim Alekseyevich; KONASHINSKIY, D.A., redaktor; BERG, A.I.,
redaktor; DZHIGIT, I.S., redaktor; ISLIN, O.G., redaktor;
KULIKOVSKIY, A.A., redaktor; MOZHZHIEVLOV, B.N., redaktor;
SMIRNOV, A.D., redaktor; TARASOV, F.I., redaktor; TRAMM, B.F.,
redaktor; CHECHIK, P.O., redaktor; SHAMSHUR, V.I., redaktor.
VOROMIN, K.P., tekhnicheskij redaktor.

[Tuning of radio receivers] Malazhivanie priemnikov. 2-e izd.,
perer. Moskva, Gos. energ. izd-vo, 1955. 87 p. (Massovaia
radiobiblioteka, no. 225) (MLRA 9:2)
(Radio -- Receivers and reception)

YELIN, O.G.

FEDOTOV, Yakov Andreyevich; KULIKOVSKIY, A.A., redaktor; BERO, A.I.,
redaktor; DZHIGIT, I.S., redaktor; YELIN, O.G., redaktor; MOZH-
ZHEVELOV, B.N., redaktor; SMIRNOV, A.D., redaktor; TARASOV, F.I.,
redaktor; TRAMM, B.F., redaktor; CHECHIK, P.O., redaktor;
SHASHMUR, V.I., redaktor.; LARIONOV, G.Ye., tekhnicheskiy redaktor

[Crystal triodes] Kristallicheskia triody. Moskva, Gos.energ.
izd-vo, 1955. 94 p. (Massovaja radiobiblioteka no.216)
(Electron tubes) (MLRA 8:9)

SHADOV,R.; CHECHIK,P.O.[translator]; BERG,A.I., redaktor; DZHIGIT,I.S., redaktor; YELIN,O.G., redaktor; KULIKOVSEYY,A.A., redaktor; MOZH-ZHEVYLOV,B.N., redaktor; SMIRNOV,A.D., redaktor; TARASOV,F.I., redaktor; TRAMM,B.F., redaktor; SHAMSHUR,V.I., redaktor; LEVITIN, Ye.A., redaktor; VORONIN,K.P., tekhnicheskij redaktor

[Testing apparatus for repairing radio receivers. Translated from the German] Ispytatel'naia apparatura dlia remonta priemnikov. Perer.perevod s nemetskogo P.O.Chechika. Moskva, Gos.energ.izd-vo 1955. 125 p. (Massovaia radiobiblioteka, no.232) (MIRA 9:3) (Radio--Receivers and reception)

YELIN, O.G.

SOMINSKIY, Monus Samuilovich; BRODDE, A.M., redaktor; BERG, A.I., redaktor; DZHIGIT, I.S., redaktor; YELIN, O.G., redaktor; KULIKOVSKIY, A.A., redaktor; MOZHZHEVELOV, B.N., redaktor; SMIRNO, A.D., redaktor; TARASOV, F.I., redaktor; TRAMM, B.F., redaktor; CHECHIK, P.O., redaktor; SHAMSHUR, V.I., redaktor; LARIONOV, G.E., tekhnicheskij redaktor

[Semiconductors and their use] Poluprovodniki i ikh primenie..
Moskva, Gos.energ. izd-vo, 1955. 127 p. (Massovaia radiobiblioteka,
no.236) (MLRA 9:2)

(Semiconductors)

MAZEL', Klementiy Borisovich; BRODDE, A.M., redaktor; BERG, A.I.,
redaktor; DZHIGIT, I.S., redaktor; YELIN, O.G., redaktor; KULIKOVSKIY,
A.A., redaktor; MOZHZHDEVLOV, S.V., redaktor;
SMIRNOV, A.D., redaktor; TARASOV, F.I., redaktor; TRAMM, B.P.,
redaktor; CHECHIK, P.O., redaktor; SHAMSHUR, V.I.: redaktor;
SKVORTSOV, I.M., tekhnicheskij redaktor

[Voltage and current stabilizers] Stabilizatory napriashenija i
toka. Moskva, Gos.energ.izd-vo, 1955. 133 p. (Massovaja radio-
biblioteka, no.218)
(Voltage regulators)

YELIN, O.G.

ROZENBLATT, Moisey Aronovich; BERG, A.I., redaktor; DZHIGIT, I.S.,
redaktor; YELIN, O.G., redaktor; KULIKOVSKIY, A.A., redaktor;
MOZHNEVYEV, B.N., redaktor; SHIRNOV, A.D., redaktor; TARASOV,
F.I., redaktor; TRAMM, B.F., redaktor; CHICHIK, P.O., redaktor;
SHAMSHUR, V.I., redaktor; SENCHEKOV, A.F., redaktor; VORONIN,
K.P., tekhnicheskij redaktor.

[Magnetic amplifiers] Magnitnye usiliteli. Moskva, Gos.energ.
izd-vo, 1955. 135 p. (Massovaja radiobiblioteka, no.230)
(Magnetic amplifiers) (MLRA 8:11)

YELIN, O.G.
KULIKOVSKIY, A.A.; BERG, A.I., redaktor; DZHIGIT, I.S., redaktor;
YELIN, O.G., redaktor; MOSZHEVELOV, G.N., redaktor; SMIRNOV,
"A.D.", redaktor; TABASOV, A.D., redaktor; TRAMM, B.Y., redaktor;
CHECHIK, P.O., redaktor; SHAMSHUR, V.I., redaktor; ZHUKHOVITSKIY,
B. Ya., redaktor; FRIDKIN, A.M., tekhnicheskiy redaktor

[Manual for the amateur radio operator] Spravochnik radioliubitelja. Moskva, Gos.energ.izd-vo, 1955. 256 p. (Massovaia radiobiblioteka, no.222)
(Radio-Amateur's manuals)
